This Work Assignment will cover analysis of responsible parties at designated hazardous waste sites, to be determined by Regional contacts and the Work Assignment Officer. The following tasks will involve these general activities:

1. Establish a history of ownership for the property or properties comprising a hazardous waste location.

2. Secure general financial information on owners and operators of landfills or facilities, and on transporters and generators of toxic materials.

3. Determine the responsible party's ability to pay in cleaning up the site.

4. Respond to specified additional tasks as requested by OWPE.

Each site documentation should be recorded by specific Superfund account number. Each site must be separately budgeted, whether or not complete, and enumerated in monthly progress reports to OWPE.
